

### Marsee Teardrop Tankbag

Marsee's 12-Liter Teardrop Tankbag is easily installed via a four-strap setup that features the Quick Release Mono Buckle Mounting System, and when combined with the bag's non-slip, non-abrasive bottom, attaches quite securely. Though every bike is different, the variable length ties are simple to adjust and mount cleanly to frame points beneath the seat and near the steering head. As the instructions warn, do be very careful not to set the straps where they'll interfere with the handlebar's range of motion.

Once the tankbag is in place, its four Quick Release buttons are a breeze to operate, making fill ups and trips into restaurants time-conserving affairs. And should a short hike summon, the included shoulder straps come in quite handy. The top-mounted map compartment sports waterproof zippers, effec-

tively keeping the rain from ruining the paper trail. The main compartment is lined in a waterproof silver material that not only defies the drops, its light color makes it easy to see the dark items often obscured by the dimness of a run-of-the-mill black interior. Constructed from 1680-denier waterproof fabric, this expandable bag offers up

to 12 liters of useful storage, and it's tough enough to handle the touring regimen for many years to come.

### Willie and Max Revolution Series Saddlebags

When we received Triumph's impressive Thunderbird cruiser, it had no luggage. That's fine for the boulevard types, but we tend to aim for strips a few states over. Fortunately, the folks at Willie and Max provided a quick fix for our storage dilemma.

The Revolution Series Saddlebags are designed with cruising machines in mind and their latest styles and ease of use suited our 'bird to a T. The Revolutions are available in both hard mount and throw-over versions, but for our multi-bike needs, we chose the more universal throw-overs. The bags come equipped with reinforced yokes that can be laced together in numerous configurations to fit nearly any application either above or below the seat. Reusable zip-ties are included for an extra measure of security. Another nice feature is the stiff plastic backing that helps add extra stability while underway. This also ensures the bags keep their shape even after a good soaking or two. Unfortunately, they're not waterproof; so keep unexpected showers in mind when choosing liners. Stout plastic closures hidden beneath shiny chrome

buckles offer easy access for quick loading and unloading.

And because looks are an intrinsic part of the cruiser experience, Willie and Max offer three distinctive new styles in the Revolution Series. Riders can choose from Grommet, Swooped, and Studded designs. With more than enough room for a long weekend for two, or just added space for the soloist, the Willie and Max Revolution Series Saddlebags are an inexpensive way to create your own touring cruiser.
