

Summer Glovin'

Tour Master's Intake Air glove features a comfortable, abrasion-resistant, Armor-Link mesh back and fingers with soft, perforated leather and stretch Lycra forchettes, perforated-leather knuckle and wrist panels, and ballistic polyester EVA-foam knuckle and wrist padding. A reinforced, perforated leather palm with light padding reduces shock and vibration, while precurved palm and fingers with stretch Lycra expansion panels improve comfort and dexterity while reducing hand fatigue. Armor-Link mesh and perforated leather combine with a Velcro wrist closure for a well-ventilated but secure cuff. Available in black, blue, red, silver, and white in sizes XS-3XL (4XL in black). \$39.99. **Tour Master**, www.TourMaster.com.

Gee, Man

GMan's GBushing shifter linkage bushing is made from a strong Oil-Lite material that can hold its lubricating properties almost indefinitely, creating smooth, effortless shifting time after time. The GBushing is a permanently oiled bronze bushing designed to replace the stock steel shifter bushing, eliminating much of the friction at the pivot point for the heel/toe shifter. GMan says this is not a transmission fix, but a linkage friction reducer that will improve the shifting smoothness of even a brand-new bike. Available for Suzuki Intruder VL1500, Boulevard C50, C90, C109R, and M109R; and Kawasaki, Honda, and Yamaha cruisers GBushings are currently in R&D. From \$23.95. **GMan Industries**, 425/228-1484, www.GManIndustries.com.

Minimalist Instrumentation

Speedway Instruments' new microSpeed speedometer will fit any late-model Harley-Davidson and metric bikes with electronic transmission speed sensors. It features a 0.4", three-digit numerical display (in either km/h or mph) and features two tripmeters tailored toward fuel and oil mileage. Speed calibration and configuration are managed through a simple touch-screen interface. The microSpeed is available in black or chrome and measures a tiny 1.4" x 0.9" x 0.5". Available at any Kuryakyn dealer. \$229.99. **Speedway Instruments**, www.SpeedwayInstruments.com.

Booty Comfort

Tired of being sore and achy after a great day of touring? Time to check out the new Black Label Series motorcycle seats from Willie & Max, designed with your comfort in mind. The Black Label Series features two-up touring, solo, and pillion motorcycle seats for Honda, Kawasaki, and Suzuki models, with more styles coming soon. Made with quality materials, the seats feature a thermoformed base, high-density/high-resiliency foam, and UV-resistant, automotive-grade, synthetic leather with top-stitched, reinforced seams. Lightweight and durable, the seats are designed to be a direct replacement for stock seats, and are easily installed with either factory seat brackets or the included powdercoated mounting brackets. \$159.99-\$399.99 **Willie & Max**, 847/356-7763 www.WillieAndMax.com.

Your Big Break

The 6" BIG brake from 360 Brake is completely contained in a 6" hub mounted around the axle, hiding the entire assembly. The 6" BIG brake offers safe stopping for bigger bikes by utilizing circular piston and pads activated by hydraulic pressure, delivering 360 degrees of braking pressure to the rotor in a compact 5" or 6" hub. The grooved and vented rotor, together with the brake hat's specially designed venting system, effectively eliminates dust and heat build-up by providing superior airflow to the brake. The BIG brake fits most custom and V-twin configurations, and is offered in a polished finish with chrome- and color-anodized finishes as upgrades. Can be adapted to most billet wheels. From \$1,095. **360 Brake**, 317/875-0360, www.360Brake.com.

Lighter, Brighter Wings

Motolight's fender-mounted halogen riding lights for Honda's Gold Wing GL1800 turn with the bike's front wheel, mount with existing fender bolt-holes, and require no special wiring harness. They are available in five finish options — chrome, black chrome, brushed metal, polished, or black powdercoat. Motolights increase your daytime visibility as well as your nighttime vision with standard 35-watt halogen MR16 bulbs at an 8-degree beam spread; 50-watt halogen white or amber bulbs are optional. They come with a three-year warranty, and the company will replace burned-out bulbs for life for the light's original owner. Motolight offers 10 percent off for active or veteran military, police, or fire personnel. From \$405. **Motolight**, 800/567-8346, www.Motolight.com. **RB**
