

Max Pax Tour Trunk Mounting Instructions

www.willieandmax.com

The Willie & Max “Max-Pax” Tour Trunk attaches to most sissy bars and luggage rack systems. The hook and loop strap and the laces allow for easy, secure mounting and dismounting.

Installation:

Position the “Max-Pax” Tour Trunk on the luggage rack, attach the hook and loop strap securely around the sissy bar. Tie the laces through the web tabs and secure to the luggage rack. Various ways of achieving a tight mount are utilized depending upon your luggage rack and sissy bar combination. Never ride with the Tour Trunk unless the compartment is closed with either quick buckles or the hook and loop fastener.
