

# Tour Trunk Mounting Instructions

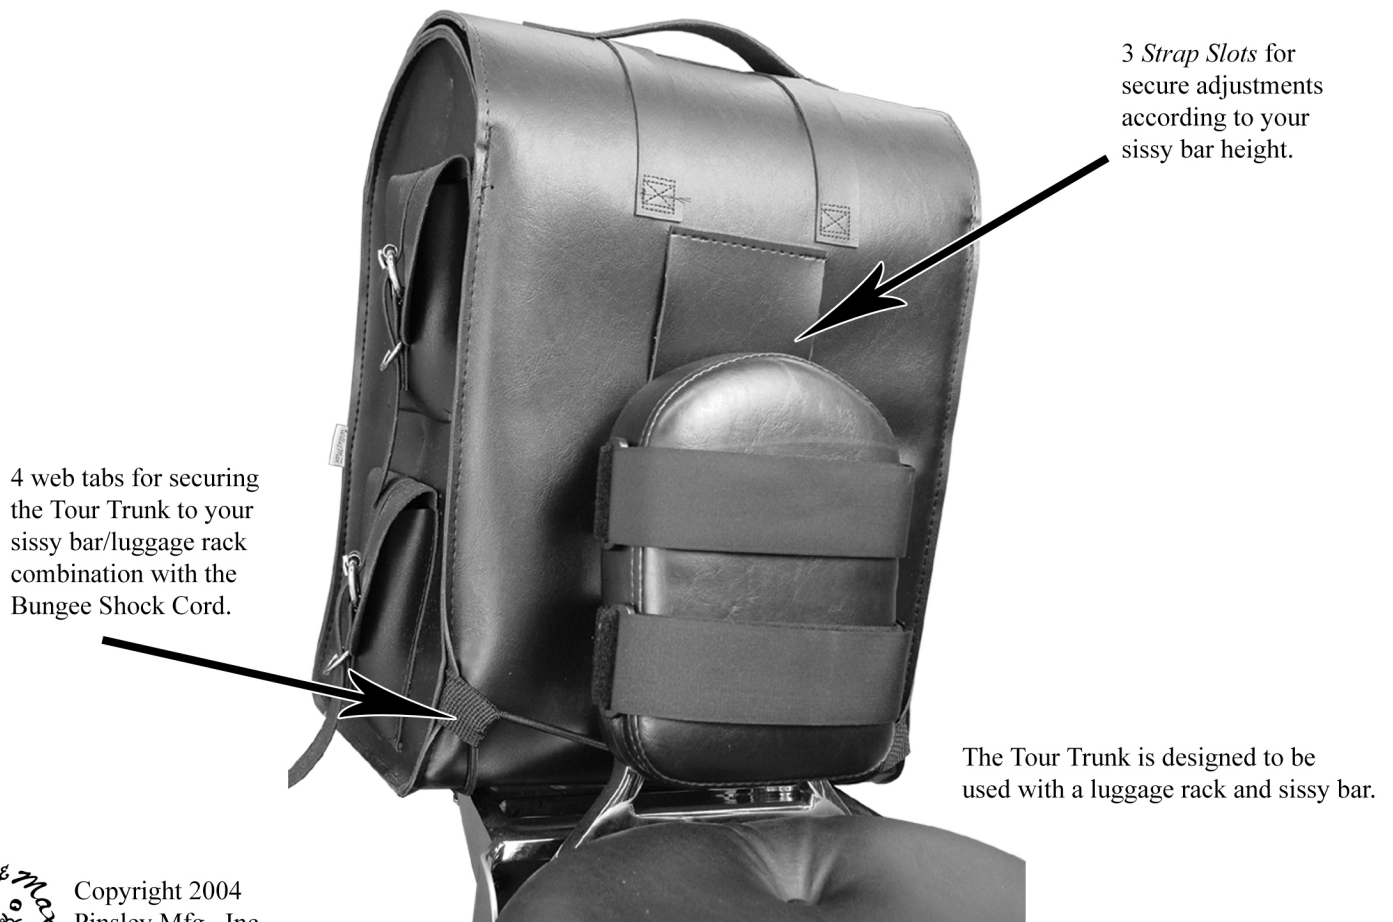

## TT550, TT551 and TT552

[www.willieandmax.com](http://www.willieandmax.com)

The Willie & Max Tour Trunk attaches to most sissy bars and luggage rack systems. The dual hook and loop straps and the bungee shock cord allow for easy, secure mounting and dismounting.

### **Installation:**

Position the Tour Trunk on the luggage rack, attach the hook and loop straps securely around the sissy bar. Slip the bungee shock cord through the web tabs and secure the hooks. Various ways of achieving a tight mount are utilized depending upon your luggage rack and sissy bar combination. Never ride with the Tour Trunk unless the compartment is closed with either quick release buckles or the hook and loop closure and single quick release buckle.
